

# Social inclusion in distance learning lessons

Kahoot!

1

## INTERACTIVE ACTIVITIES

Make students do activities together, making them interact with each others, using interactive tools like kahoot, word clouds or playing games like hangman. They are easy to use and it is a fun way to make students compete.

2

## ONLINE BRAINSTORM

Get the people to brainstorm and share their ideas with the others, making the lessons more interesting.

3

## CAMERA

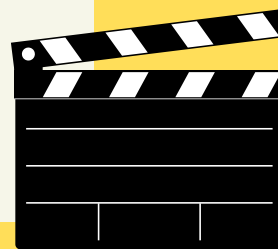

People should turn on their cameras, that makes you feel closer to people and it is a better way to work because it makes you focus and your behavior improves.

4

## ANALYSE MOVIES

Watch movies together related to the subject, take notes and later in breakout rooms discuss what you liked and disliked about it.

5

## MAKE THE STUDENTS WORK TOGETHER

Make the students do work together and make them team up, so they include each other in the work, making them relate to each other.

6

## INCREASE STUDENT ENGAGEMENT

Make students work in groups more. Engage them more into the tasks.
